

COMMISSION

COMMISSION DECISION

of 12 July 2006

on special conditions governing certain foodstuffs imported from certain third countries due to contamination risks of these products by aflatoxins

(notified under document number C(2006) 3113)

(Text with EEA relevance)

(2006/504/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Regulation (EC) No 178/2002 of the European Parliament and of the Council of 28 January 2002 laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety⁽¹⁾, and in particular Article 53(1)(b)(ii) thereof,

Whereas:

(1) The Scientific Committee for Food has noted that aflatoxin B1 is a potent genotoxic carcinogen and, even at extremely low levels, contributes to the risk of liver cancer.

(2) Commission Regulation (EC) No 466/2001 of 8 March 2001 setting maximum levels for certain contaminants in foodstuffs⁽²⁾ lays down maximum levels for certain contaminants and in particular aflatoxins that are permitted in foodstuffs. Those limits for aflatoxins have been regularly exceeded in certain foodstuffs from certain third countries.

(3) Such contamination constitutes a serious threat to public health within the Community and it is therefore appropriate to adopt special conditions at Community level.

⁽²⁾ OJ L 77, 16.3.2001, p. 1. Regulation as last amended by Regulation (EC) No 199/2006 (OJ L 32, 4.2.2006, p. 34).

(4) Commission Decision 2000/49/EC of 6 December 1999 repealing Decision 1999/356/EC and imposing special conditions on the import of peanuts and certain products derived from peanuts originating in or consigned from Egypt⁽³⁾ lays down special conditions on the import of peanuts and certain products derived from peanuts originating in or consigned from Egypt.

(5) Commission Decision 2002/79/EC of 4 February 2002 imposing special conditions on the import of peanuts and certain products derived from peanuts originating in or consigned from China⁽⁴⁾ lays down special conditions on the import of peanuts and certain products derived from peanuts originating in or consigned from China.

(6) Commission Decision 2002/80/EC of 4 February 2002 imposing special conditions on the import of figs, hazelnuts and pistachios and certain products derived thereof originating in or consigned from Turkey⁽⁵⁾, lays down special conditions on the import of figs, hazelnuts and pistachios and certain products derived thereof originating in or consigned from Turkey.

(7) Commission Decision 2003/493/EC of 4 July 2003 imposing special conditions on the import of Brazil nuts in shell originating in or consigned from Brazil⁽⁶⁾ lays down special conditions on the import of Brazil nuts in shell originating in or consigned from Brazil.

⁽³⁾ OJ L 19, 25.1.2000, p. 46. Decision as last amended by Decision 2004/429/EC (OJ L 154, 30.4.2004, p. 19, corrected by OJ L 189, 27.5.2004, p. 13).

⁽⁴⁾ OJ L 34, 5.2.2002, p. 21. Decision as last amended by Decision 2004/429/EC.

⁽⁵⁾ OJ L 34, 5.2.2002, p. 26. Decision as last amended by Decision 2004/429/EC.

⁽⁶⁾ OJ L 168, 5.7.2003, p. 33. Decision as amended by Decision 2004/428/EC (OJ L 154, 30.4.2004, p. 14, corrected by OJ L 189, 27.5.2004, p. 8).

- (8) Commission Decision 2005/85/EC of 26 January 2005 imposing special conditions on the import of pistachios and certain products derived from pistachios originating in or consigned from Iran⁽⁷⁾, lays down special conditions on the import of pistachios and certain products derived from pistachios originating in or consigned from Iran
- (9) Many of the special conditions for imports of the foodstuffs covered by Decisions 2000/49/EC, 2002/79/EC, 2002/80/EC, 2003/493/EC and 2005/85/EC from Brazil, China, Egypt, Iran and Turkey are the same. Accordingly, in the interest of clarity of Community legislation, it is appropriate to set out the special conditions for the import of those foodstuffs from those third countries due to contamination of those products by aflatoxins in a single Decision.
- (10) Regulation (EC) No 882/2004 of the European Parliament and of the Council of 29 April 2004 on official controls performed to ensure the verification of compliance with feed and food law, animal health and animal welfare rules⁽⁸⁾ establishes at Community level a harmonised framework of general rules for the organisation of official controls.
- (11) For some foodstuffs from certain third countries, specific additional measures are necessary.
- (12) The measures provided for in this Decision, in particular as regards foodstuffs from Iran and Brazil, have a significant impact on the control resources of the Member States. It is therefore appropriate to require that all costs resulting from sampling, analysis, storage and all costs resulting from official measures taken as regards non-compliant consignments related to the official controls of foodstuffs from Iran and Brazil pursuant to this Decision are to be borne by the importers or food business operators concerned.
- (13) From the findings of the Commission's Food and Veterinary Office (FVO) mission, it may be concluded
- that Brazil cannot currently ensure reliable analytical results or guarantee lot integrity in respect of certification of consignments of unshelled Brazil nuts. Furthermore, it may also be concluded that current official controls on returned lots are inadequate. It is therefore appropriate to restrict the analyses to the official laboratory which can provide guarantees as regards the analytical results and to impose strict conditions regarding the return of non-conforming lots. In the event that those strict conditions are not complied with, subsequent non-conforming lots should be destroyed.
- (14) In the interests of public health, Member States should keep the Commission informed through quarterly reports of all results of official controls carried out in respect of consignments of foodstuffs covered by this Decision. Such reports shall be in addition to the notification obligations under the rapid alert system for food and feed established by Regulation (EC) No 178/2002.
- (15) It is important to ensure that the sampling and analysis of consignments of foodstuffs covered by this Decision are performed in a harmonised manner throughout the Community. Accordingly the sampling and analysis to be performed under this Decision should be carried out in accordance with the provisions of Commission Regulation (EC) No 401/2006 of 23 February 2006 laying down the methods of sampling and analysis for the official control of the levels of mycotoxins in foodstuffs⁽⁹⁾.
- (16) The operation of this Decision should be kept under review on the basis of the guarantees provided by the competent authorities of the third countries concerned and of the results of the official controls carried out by Member States in order to assess whether the special conditions provide a sufficient level of protection of public health within the Community and whether they are still needed.
- (17) Decisions 2000/49/EC, 2002/79/EC, 2002/80/EC, 2003/493/EC and 2005/85/EC should accordingly be repealed.

(18) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on the Food Chain and Animal Health,

HAS ADOPTED THIS DECISION:

*Article 2***Definitions**

For the purposes of this Decision, the definitions laid down in Articles 2 and 3 of Regulation (EC) No 178/2002 and in Article 2 of Regulation (EC) No 882/2004 shall apply.

'Designated points of import' means the points through which the foodstuffs referred to in Article 1 may only be imported into the Community. An exhaustive list of designated points of import is provided in Annex II.

*Article 3***Results of sampling and analysis and health certificate**

1. Member States may only permit imports of the foodstuffs referred to in Article 1 (hereafter referred to as foodstuffs), where the consignment is accompanied by the results of sampling and analysis and a health certificate ⁽¹⁾ in accordance with the model set out in Annex I, completed, signed and verified by an authorised representative of:

- (a) the Ministério da Agricultura, Pecuária e Abastecimento (MAPA) for foodstuffs from Brazil;
- (b) the State Administration for Entry-Exit inspection and Quarantine of the People's Republic of China for foodstuffs from China;
- (c) the Egyptian Ministry of Agriculture for foodstuffs from Egypt;
- (d) the Iranian Ministry of Health for foodstuffs from Iran;
- (e) the General Directorate of protection and Control of the Ministry of Agriculture and Rural Affairs of the Republic of Turkey for foodstuffs from Turkey.

⁽¹⁾ Health certificates shall be drawn up in a language understood by the certifying officer, enabling the certifying officer to be fully aware of the significance of the contents of each certificate they sign and in a language understood by the control official of the country of import.

2. The health certificate provided for in paragraph 1 shall only be valid for imports of foodstuffs into the Community no later than four months from the date of issue of the health certificate.

3. The competent authorities in each Member State shall ensure that the foodstuffs are subject to documentary checks to ensure that the requirement of the results of sampling and analysis and the health certificate provided for in paragraph 1 are complied with. The documentary check must take place at the point of first introduction into the territory of the Community.

4. Where a consignment of foodstuffs is not accompanied by the results of sampling and analysis and the health certificate provided for in paragraph 1, the consignment may not enter the Community for onward transit to the designated point of import nor be imported into the Community and must be re-dispatched to the country of origin or destroyed.

5. The sampling and the analysis provided for in paragraph 1 must be performed in accordance with the provisions of Regulation (EC) No 401/2006.

6. Each consignment of foodstuffs shall be identified with a code which corresponds to the code on the sampling results of the sampling and analysis and health certificate referred to in paragraph 1. Each individual bag, or other packaging form, of the consignment shall be identified with that code.

*Article 4***Designated points of import into the Community**

1. Foodstuffs may only be imported into the Community through one of the designated points of import listed in Annex II.

2. The competent authorities in each Member State shall ensure that the designated points of import ⁽²⁾ listed in Annex II comply with following requirements:

- (a) the presence of trained staff to perform official controls on consignments of foodstuffs;

⁽²⁾ The requirements apply to the designated points of import or to the place where the sampling effectively takes place in case where the consignment is transported from the point of import under official control to that place to perform the sampling.

(b) the availability of detailed instructions regarding sampling and the sending of the samples to the laboratory, in accordance with provisions in Annex I of Regulation (EC) No 401/2006;

(c) the possibility to perform the unloading and the sampling in a sheltered place at the designated point of import; it must be possible to place the consignment of the foodstuffs under the official control of the competent authority from the designated point of import onwards in cases where the consignment has to be transported in order to perform the sampling;

(f) the availability of an accredited official laboratory⁽¹³⁾ for aflatoxin analysis, situated at a place to which the samples can be transported within a short period of time; the laboratory must have the appropriate grinding equipment for homogenising 10 to 30 kg samples⁽¹⁴⁾. The laboratory must be able to analyse the sample within a reasonable period of time in order to comply with the 15 working day maximum period of detention for consignments.

3. Member States shall ensure that food business operators must make available sufficient human resources and logistics to unload the consignment of foodstuffs, thus enabling representative sampling to take place.

In the case of special transport and/or specific packaging forms, the operator/responsible food business operator must make available to the official inspector the appropriate sampling

⁽¹³⁾ Laboratory that is accredited and is an official laboratory (belonging to the competent authority structure) or a laboratory designated by the competent authority.

⁽¹⁴⁾ The grinding step for homogenisation as part of sample preparation, can be performed outside the laboratory, but the premise where the grinding is performed must have the appropriate grinding equipment, environment and protocol for homogenisation.

Official control

1. The competent authorities in each Member State shall take a sample for analysis, in accordance with the provisions of Annex I of Regulation (EC) No 401/2006 from consignments of foodstuffs for analysis of aflatoxin B1 and total aflatoxin contamination before release for free circulation from the designated point of import into the Community.

2. The sampling for analysis referred to in paragraph 1 shall be carried out on:

(a) each consignment of foodstuffs from Brazil;

(b) approximately 10 % of the consignments of foodstuffs from China;

(c) approximately 20 % of the consignments of foodstuffs from Egypt;

(d) each consignment of foodstuffs from Iran;

Article 9

Review

This Decision shall be reviewed on the basis of the reports provided for in Article 5(4) and guarantees provided by the competent authorities of countries exporting the foodstuffs and of the results of the sampling and analysis carried out by Member States in order to assess whether the conditions set out in Articles 3, 4, 5, 6, 7 and 8 provide a sufficient level of protection of public health within the Community and whether they are still necessary.
